- Team Size : **5 developers**
- Technologies : **Groovy, Grails, Hibernate, AngularJS, Tomcat, MySQL, jQuery, Redis, Memcache, RabbitMQ Server, GIT and other third party API's .**
- Role : **Software Developer**
- Duration : **Mar-2016 to Aug-2018**
- Organization : **TO THE NEW Digital**

- **Content Automation:** A tool to automate the delivery of video contents for online access on YouTube and DITTO tv. This tool was used to upload video content for Sony, Colors, Zee along with their metadata for online viewing. Major features of this tool were to capture data from UI and generate XML/CSV then uploading the same with the video file and thumbnail images. In phase 2 of the project we are planning to integrate ASPERA for quickly uploading to YouTube. We are also integrating ELEMENTAL server with our tool and a secondary application which will facilitate a priority queue to ensure that not all systems in the network start sending the data.

- Team Size : **3 Developers**
- Technologies : **Groovy, Grails, Tomcat, MySQL, jQuery, Elemental.**
- Role : **Software Developer**
- Duration : **12 months**
- Organization : **TO THE NEW Digital**

- **DDEX Ingestion Tool:-** A tool to complete the Digital Supply Chain. This tool implements the standardised Digital Data Exchange (DDEX) standards which are widely used by major merchants like iTunes, Google Music, YouTube and many more. Through this tool we facilitated the functionality for the music providers to ingest their content to merchants like Google and YouTube. Google will be starting Google Music using this tool in India.

- Team Size : **2 Developers**
- Technologies : **Groovy, Grails, Hibernate, Tomcat, MySQL, jQuery.**
- Role : **Software Developer**
- Duration : **3 Months**
- Organization : **TO THE NEW Digital**
